Individual Self-Assessment Form for Smart Grids

First name:	Javier
Family name:	Muñoz Sáez
Group Nr.:	2

Evaluate your (use the numerical grade as indicated below):

Topic	**Grade**
1. Knowledge acquired throughout the project:	10
a. Learnt by self-study:	9
b. Learnt from others:	5
c. Taught to others:	8
2. Cooperation with other class members:	10
3. Participation in activities and on time:	10
4. General contribution to the project work:	10
5. General engagement with the problem solving and reading:	10
Total	9

Grading system:

Scale	**Grade Description**
10.00	Matrícula de Honor (Matriculation with Honors)
9.00 - 9.99	Sobresaliente (Outstanding)
7.00 - 8.99	Notable (Very Good)
5.00 - 6.99	Aprobado (Pass)
0.00 - 4.99	Suspenso (Failure)

For each grading item you should add a justification why you opt for that grade.

Justification

1. Knowledge acquired throughout the project:

I learnt a lot about running powerflows which was also very usefull for “the power system” subject.
I really liked the small Agile slides in the atenea, tried to put it to work but I guess my group is not engaged enough to do small sprints.

a. Learnt by self-study:

I spent many many hours debugging pandapower, and I grew on me.

b. Learnt from others:

Patience and AI aided work.

c. Taught to others:

Everything python related and motivational couch.

2. Cooperation with other class members:

It was hard but we managed at the end to have a very dynamic and productive

3. Participation in activities and on time:

I was the one busting the balls of everyone creating the google meets and going after people to join in time.

4. General contribution to the project work:

I started early so I naturally put more hours than the others and output more work.

5. General engagement with the problem solving and reading:

Super focused in the real world applications once I understood powerflows could be used in other subjects.
